FUTURES

Index to Volume 1

No 1 September 1968
No 2 December 1968
No 3 March 1969
No 4 June 1969
No 5 September 1969
No 6 December 1969

Airport planning. *J. Block.* 1.4, 318–324
An experimental study of group opinion. *N. Dalkey.* 1.5, 408–426
Analyses from a group opinion study. *N. Dalkey.* 1.6, 541–551
Aviation—The future of civil. *N. W. Boorer.* 1.3, 206–226
Bellagio declaration on planning—The. 1.3, 182–183
Chasm ahead—The. *Erich Jantsch.* 1.4, 314–317
City form—Urban transportation and. *Brian Richards.* 1.3, 239–251
Civil aviation—The future of. *N. W. Boorer.* 1.3, 206–226
Computer developments and applications 1968–2000—Forecast of. Chresten A. Bjerrum. 1.4, 331–338
Cross impact matrices. *T. J. Gordon.* 1.6, 527–531
Cross impact matrix method of forecasting—Initial experiments with. *T. J. Gordon and H. Hayward.* 1.2, 100–116
Delphic study examines developments in medicine. *A. Douglas Bender, Alvin E. Strack, George W. Ebright and George von Haunalter.* 1.4, 289–303
Deserts, the granaries of the future—Sand. *Hugo Boyko.* 1.3, 191–197
Economic models of the future—Introducing sociological forecasting into. *E. Fontela.* 1.5, 380–381
Education and practice in 2000—Engineering. *Jay W. Forrester.* 1.5, 391–401
Energy, an alternative source for power generation—Solar. *Peter E. Glaser.* 1.4, 304–313
Energy resources in the future—World. *John McHale.* 1.1, 4–13
Engineering education and practice in 2000. *Jay W. Forrester.* 1.5, 391–401
Engineering—Macro. *Frank P. Davidson.* 1.2, 153–161
Eskimo—The future of the. *J. Lotz.* 1.1, 54–65
Europe in the 1970's—Models of Western. *Christoph Bertram.* 1.2, 142–152
Food crisis—The world. *Georg Borgstrom.* 1.4, 339–355
Forecast of computer developments and applications 1968–2000. *Chresten A. Bjerrum.* 1.4, 331–338
Forecasting model to aid research and development planning —A. *Marvin J. Cetron and Bodo Bartocha.* 1.6, 479–487
Forecasting the need for research and development. *H. Hunt.* 1.5, 382–390
Fourth power—The. *Jarko Cerha.* 1.5, 427–439
Future of civil aviation—The. *N. W. Boorer.* 1.3, 206–226
Future of the Eskimo—The. *J. Lotz.* 1.1, 54–65
Future prices in long-term forecasting. *E. Fontela and G. McNeill.* 1.1, 14–20
Future role of women—The. *Ingrid Fredriksson.* 1.6, 532–540
Futures research—The historian's role in. *Arthur I. Waskow.* 1.2, 117–124
Government—The role of futures in. *Yehezekel Dror.* 1.1, 40–46
Governmental research and development—The new thaumaturgy of. *Derek Medford.* 1.6, 510–526
Group opinion—An experimental study of. *N. Dalkey.* 1.5, 408–426
Group opinion study—Analyses from a. *N. Dalkey.* 1.6, 541–551
Historian's role in futures research—The. *Arthur I. Waskow.* 1.2, 117–124
Human futures. *Robert Jungk.* 1.1, 34–39
Initial experiments with the cross impact matrix method of forecasting. *T. J. Gordon and H. Hayward.* 1.2, 100–116
Innovation—'Project Sappho', a study in industrial. *R. C. Curnow and G. G. Moring.* 1.2, 82–90
Integrative planning of science and technology. *Erich Jantsch.* 1.3, 185–190
Interactions between technological and social changes. *Oto Sulc.* 1.5, 402–407
Introducing sociological forecasting into economic models of the future. *E. Fontela.* 1.5, 380–381
Leisure as an issue for the future. *Max Kaplan.* 1.2, 91–99
Look-out institutions for shaping the environment. *Robert Jungk.* 1.3, 227–231
Macro-engineering. *Frank P. Davidson.* 1.2, 153–161
Medicine—Delphic study examines developments in. *A. Douglas Bender, Alvin E. Strack, George W. Ebright and George von Haunalter.* 1.4, 289–303
Metals and non-metallic materials. *W. O. Alexander.* 1.6, 500–509
Methodology. *T. J. Gordon, Robert J. Wolfson and Robert C. Sahr.* 1.6, 522
Mineral resources—Oceanic. *John L. Mero.* 1.2, 125–141
Models of Western Europe in the 1970's. *Christoph Bertram.* 1.2, 142–152
Needs research. *R. I. Hart.* 1.5, 445–457
New thaumaturgy of governmental research and development—The. *Derek Medford.* 1.6, 510–526
Non-metallic materials—Metals and. *W. O. Alexander.* 1.6, 500–509
Oceanic mineral resources. *John L. Mero.* 1.2, 125–141
Pattern of Prediction 1763–1973: The first forecast of the future. *I. F. Clarke.* 1.4, 325–330
Pattern of Prediction 1763–1973: Jules Verne and the vision of the future. *I. F. Clarke.* 1.5, 464–468
Pattern of Prediction 1763–1973: Forecasts of future wars 1871–1914. *I. F. Clarke.* 1.6, 553–557
Planning and designing for the future. *Erich Jantsch.* 1.5, 440–444
Political feasibility—The prediction of. *Yehezkel Dror.* 1.4, 282–288
Power generation—Solar energy, an alternative source for. *Peter E. Glaser.* 1.4, 304–313
Prediction of political feasibility—The. *Yehezkel Dror.* 1.4, 282–288
Prices in long-term forecasting—Future. *E. Fontela and G. McNeill.* 1.1, 14–20
Problems of futures research in the social sciences. *Klaus Lompe.* 1.1, 47–53
'Project Sappho', a study in industrial innovation. *R. C. Curnow and G. G. Moring.* 1.2, 82–90

Research development—Forecasting the need for. *H. Hunt.* 1.5, 382–390
Research and development manager—The value of technological forecasting for the. *Marvin J. Cetron and Edmund B. Mahinske.* 1.1, 21–33
Research and development planning—A forecasting model to aid. *Marvin J. Cetron and Bodo Bartocha.* 1.6, 479–487
Research and development—The new thaumaturgy of governmental. *Derek Medford.* 1.6, 510–526
Research—Needs. *R. I. Hart.* 1.5, 445–457
Resources—Oceanic mineral. *John L. Mero.* 1.2, 125–141
Role of futures in government—The. *Yehezkel Dror.* 1.1, 40–46
Sand deserts, the granaries of the future. *Hugo Boyko.* 1.3, 191–197
São Paulo in the year 2000. *Henry Maksoud.* 1.3, 198–205
Science fiction as a source of forecast material. *Dennis Livingston.* 1.3, 232–238
Social costs and studies of the future. *Henry Winthrop.* 1.6, 488–499
Social sciences—Problems of futures research in the. *Klaus Lompe.* 1.1, 47–53
Sociological forecasting into economic models of the future—Introducing. *E. Fontela.* 1.5, 380–381
Solar energy, an alternative source for power generation. *Peter E. Glaser.* 1.4, 304–313
Transportation and city form—Urban. *Brian Richards.* 1.3, 239–251
Urban transportation and city form. *Brian Richards.* 1.3, 239–251
Value of technological forecasting for the research and development manager—The. *Marvin J. Cetron and Edmund B. Mahinske.* 1.1, 21–33
World energy resources in the future. *John McHale.* 1.1, 4–13
World food crisis—The. *Georg Borgstrom.* 1.4, 339–355
Women—The future role of. *Ingrid Fredriksson.* 1.6, 532–540

Authors

Alexander, W. O. Metals and non-metallic materials. 1.6, 500–509
Bartocha, Bodo, and Marvin J. Cetron. A forecasting model to aid research and development planning. 1.6, 479–487
Bender, A. Douglas, Alvin E. Strack, George W. Ebright and George von Haunalter. Delphic study examines developments in medicine. 1.4, 289–303
Bertram, Christoph. Models of Western Europe in the 1970's. 1.2, 142–152
Bjerrum, Chresten A. Forecast of computer developments and applications 1968–2000. 1.4, 331–338
Block, J. Airport planning. 1.4, 318–324
Boorer, N. W. The future of civil aviation. 1.3, 206–226
Borgstrom, Georg. The world food crisis. 1.4, 339–355
Boyko, Hugo. Sand deserts, the granaries of the future. 1.3, 191–197
Cerha, Jarko. The fourth power. 1.5, 427–439
Cetron, Marvin J., and Bodo Bartocha. A forecasting model to aid research and development planning. 1.6, 479–487
Cetron, Marvin J. and Edmund B. Mahinske. The value of technological forecasting for the research and development manager. 1.1, 21–33
Clarke, I. F. The pattern of prediction 1763–1973: The first forecast of the future. 1.4, 325–330
Clarke, I. F. The pattern of prediction 1763–1973: Jules Verne and the vision of the future. 1.5, 464–468
Clarke, I. F. The pattern of prediction 1763–1973: Forecasts of future wars 1871–1914. 1.6, 553–557
Curnow, R. C. and G. G. Moring. 'Project Sappho', a study in industrial innovation. 1.2, 82–90
